Business Enablement
Support

There are many facets of IT-Business alignment that may lower opinion of IT. This begins with listening to end users and should enable a culture of continuous evolution and innovation.

IT Communications
Support

Communications can involve various levels of information. Many communicate low levels issues well but should focus on evangelizing IT's vision.

	Net End User Support	Support Score	Compared to Last Year
Company Innovation	<div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div>	76%	↑ 12%

IT Support Breakdown

Enablement & Comms.
by Seniority

Ensure that end users at all levels agree on what works and what doesn't. Groups that differ from the norm should be targeted for improvement or evangelism.

Enablement & Comms.
by Department

Look beyond the averages to see the range of satisfaction rates and address key problem areas. Talk to the most disgruntled departments first to hone in key issues.

Core Services by Seniority

End users functioning in different roles within the organization place importance on different core services. Improvement should address both the right services and the right users.

IT Services Satisfaction

The core services of IT are important when determining what IT should focus on. The most important services with the lowest satisfaction offer the largest area of improvement for IT to drive business value.

vs company avg.

(Department) Services Overview

IT Services Importance & Satisfaction

Q: What could IT provide you (e.g., applications or other technology) or improve on to make you more effective in your job?

John Doe	I rely heavily on IT to do my job successfully and I feel I always get what I need in a timely manner and with a reasonable degree of accuracy.
Jane Doe	IT has been very helpful in building a solution that meets my needs.
John Doe	This app facilitates remote group working and collaboration. I don't know what I'd do without it.
Jane Doe	IT policies are communicated well and I understand why IT makes the decisions it does.
John Doe	My tickets are always dealt with quickly and IT solves my problems most of the time.
Jane Doe	I would like a new laptop because I could do my job faster if my laptop was faster.
John Doe	I travel a lot and often have network issues when I'm offsite. I would like these problems to be solved so that I am more productive.
Jane Doe	I am able to use the reporting from our CRM to pull the information I need to make decisions. However, there are opportunities to improve the data.
John Doe	The application allows me to do what I need but the process is terrible. Creating the reports I need requires pulling several reports and then manually combining them. It would be so much easier if the system could just create the report I need instead of three that I don't need!!
Jane Doe	I like that I'm able to communicate with IT and that my ideas are heard.
John Doe	Some tools I use are frustrating and I would like more training.
Jane Doe	IT policies are communicated well and I understand why IT makes the decisions it does.
