

Career Journey Potentials[®] Technical

Career Journey Potentials provides a comprehensive way of visualizing the various stages and experiences that a technology-centric professional encounters in their overachieving career. It enables the individual clarity and understanding of the different milestones, transitions, and opportunities that define their North Star for career growth and potential.

PROGRAM OVERVIEW

Defining your career journey potential typically involves identifying key stages, such as experience and lessons learned, current state, and future possibilities. Under this program, your coach assists you in identifying your skills, strengths, interests, and values through various assessment tools and exercises. She will help you understand yourself better, which is crucial for building a successful career plan.

Based on a self-assessment, your coach will help you set realistic and attainable short-term and long-term career goals. She will guide you in aligning your strengths with your personal and professional aspirations, ensuring they are clear and measurable.

Your coach will also provide guidance in exploring different career paths and potential opportunities relevant to your skills, values, and interests. She will conduct research and share resources to help you make informed decisions about potential career options.

Once your career goals are established, your coach will help you create a step-by-step action plan to achieve those goals. She will assist you in breaking down the plan into smaller, manageable tasks and developing strategies to overcome obstacles or challenges.

By outlining your career potential journey, you gain a clearer sense of your strengths, opportunities, and priorities, in support of your making informed decisions about your professional path.

YOUR COACH - MARY PATRY

- ICF Professional Certified Corporate Coach
- 10+ years as Executive Coach and Advisor
- Former CIO and IT Executive
- 40+ years of hands-on technology leadership experience

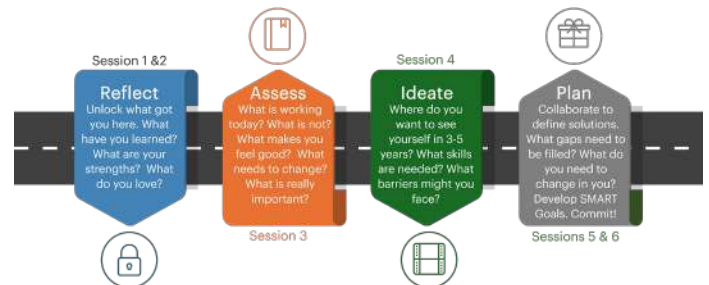

"Mary possesses great listening capabilities and is a trusted advisor, committed to providing unbiased guidance in a safe/confidential environment. She focuses on eliciting information rather than telling you what to do. She personally helped me make improvements regarding enhancing my visibility within the organization and improving my perceptions among leadership which has led to a promotion and increase this year in the scope of my responsibilities." Sr. Director, IT
